Engineered for a wide variety of cooling or heating applications
Proprietary computational analysis for guaranteed mechanical and thermal performance
Surface finishes and tolerances to meet your processing requirements
Manufactured to stringent industry standards and safety practices

For more than 40 years, Webex has been the industry's first choice in maintaining consistent and cost-effective temperature management with our Precision Engineered Heat Transfer Rolls. Webex Engineers rely upon industry experience and a proprietary analysis process to predict exactly what the heat transfer results will be prior to manufacturing. We also specialize in rolls with ultra-tight tolerances, special plating and finishing.

To meet your exact application parameters, every Webex Heat Transfer Roll is designed for optimal balance between heat transfer, minimal pressure drop inside the roll, correct fluid velocity and minimum temperature rise across the roll face. Whatever roll size or specification you need, Webex is the proven source for heat transfer roll performance.

| Optional Certifications Available | ISO 9001  
|                                | ASME Certified Pressure Vessels (Stamp U and R) |
| Size Range Capabilities         | Diameters from 2 - 48 inches  
|                                | Lengths up to 511 inch |
| Design Options                  | Single shell, double shell  
|                                | Double shell - spiral: gain pitch or straight pitch  
|                                | Fluid flow: mono-flow (standard) or duo-flow (optional)  
|                                | Guaranteed temperatures to within +/- 1 degree F across the face of the roll  
|                                | Unique gain-pitch spiral design controls cross product temperature differentials and overall heat transfer characteristics |
| Typical Tolerances              | Diametrical within +/- 0.001 inch  
|                                | Concentricity and straightness within 0.001 inch  
|                                | Optional precision concentricity and straightness to < 0.0001 inch  
|                                | Optional flawless mirror and a wide range of matte finishing available |
| Finish                         | Chrome, Nickel  
|                                | Rubber, Plasma, Ceramic, Teflon Coating  
|                                | Surface Hardened or Weld Overlay |
| Base Materials                  | Carbon Steel, Alloy Steel, Stainless Steel  
|                                | Aluminum, Copper |

TX-2400

Double wall internal spiral baffle design

24 inch rolls will have 1.5 inch NPT each end with 60 GPM flow rate

Balanced up to 1,500 FPM (unless otherwise specified)

32 Ra finish on roll face

Concentricity and straightness held within 0.002 inch (unless otherwise specified)

Actual diameter 23.625 inches ± 0.001 inch

SPECIFICATION CHART

Additional information on journal length, journal diameter and line speed would ideally be filled in using this Specification Chart.

For single diameter journals, L1 = L2 and L3 = L4

ORDERING IS EASY WITH WEBEX’S SIMPLE MODEL NOMENCLATURE.
Total Satisfaction Guarantee

Your Heat Transfer Roll must work to your satisfaction, or return it at our expense and we’ll repair or replace it. To provide this guarantee, we need to know your specific performance and operating specifications. As long as these specifications or operating conditions don’t change, the “Total Satisfaction Guarantee” will be enforced.
