

Flexible Service Plan

Peace of Mind from Unwind to Rewind

At Maxcess, we understand the importance of keeping your lines running while improving productivity. Downtime is NEVER an option. That's why we have introduced the new Flexible Service Plan.

The Flexible Service Plan allows you to purchase service and support time up front, at a discounted rate. The time can be used any time of day, any day of the week.

Cost Savings

The Flexible Service Plan offers **SAVINGS** over paying for service by the hour as needed. The block of time can be used at any time of day or night, any day of the week. Also, Flexible Service Plan customers receive all remote support services from our highly trained engineers for **FREE**.

Peace of Mind

With a block of Maxcess service time already booked up front, you no longer need to worry about unplanned downtime and costs.

Flexible Options

Your block of time can be used for any of our on-site services on all Maxcess products across guiding, slitting, tension control, winding and precision rolls. It can be used for breakdown support, troubleshooting, training, annual health checks, re-calibrating. This enables you to plan out your requirements for the 12 month duration of the plan.

Priority Access

In unplanned downtime situations, Flexible Service Plan customers receive priority access to our highly trained technicians.
