

Battery & Electronic Specialist

Only Maxcess provides end-to-end knowledge, ease of installation and decades of expertise for whether you're coating, laminating, slitting, rewinding, notching or calendering your battery web, we have solutions!

24/7 Service and Support for the Battery Industry

Uptime is everything—you need equipment that lasts. Maxcess delivers reliable solutions, ready-to-ship parts, and expert support just a call away. Work with people you can trust to be there for you through thick and thin.

Maxcess Offers:

- American-Based Factories
- Dependable Remote Support
- Spare Parts Shipped Within Hours
- On-Site Service Technicians Ready When You Need Them

Learn More About Maxcess' Battery Solutions

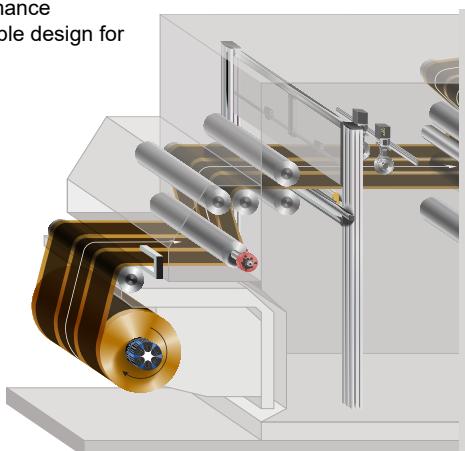

DSE-45 Broadband Sensor

- Wide sensing range for versatile web detection
- Dust and light resistant for reliable performance
- Compact, durable design for tight spaces

Tidland Control Series Knife Holder

- Passcode protection secures critical settings
- Touchscreen with wireless control for easy operation
- Self-calibrating for efficient, low-intervention slitting

End-to-End Solutions

Maxcess understands how each stage of web processing impacts the next, underlining the importance of high quality equipment that you can rely on. Maxcess provides a suite of products designed to work seamlessly together and increasing productivity in the tag and label industry.

MWS Custom Web Components

Modular Web Solutions delivers custom modules and complete custom lines designed to meet your specific requirements. Whether you need an unwind, rewind, calender, or other web handling equipment, we can meet or exceed your needs.

MAGPOWR

MAGPOWR TS Load Cells

These rugged load cells are extremely accurate devices designed with foil strain gauges that provide the lowest temperature drift rating possible. Their unique low-profile design minimizes space requirements inside the machine frames.

MAGPOWR

MAGPOWR Cygnus Controller

The Cygnus offers weightless load cell calibration for quick setups. Maintain web tension or adjust it using multifunction "smart keys" and a large backlit display for easy viewing. Improve consistency with powerful features like automatic tuning and out-of-round roll compensation.

COMPONEX

Componex WINertia Reverse Crown Idler Rolls

The Componex WINertia Reverse Crown Idler Roll features a tapered dead shaft roller helps eliminate wrinkles from the web. Operate up to 7.5 times faster with AV grooved idlers. Rolls on demand, take advantage of a five-day delivery guarantee.

WEBEX

WEBEX Electric Heat Transfer Rolls

Cost-effective and industry-leading heat transfer rolls to critically maintain temperature management. Unique gain-pitch spiral design controls cross-product temperature differentials and overall heat transfer characteristics.
