

# Flexible & Solid Die Specialist

With 70 years of precision die-cutting experience, RotoMetrics offers the ideal magnetic cylinder and flexible die combination for unmatched accuracy and performance. Trusted by converters worldwide, our expertly engineered flexible and solid die solutions are designed to work seamlessly together for optimal results on press.

## 24/7 Service and Support for the Tag and Label Industry

Uptime is everything— you need equipment that lasts. Maxcess delivers reliable solutions, ready-to-ship parts, and expert support just a call away. Work with people you can trust to be there for you through thick and thin.

### Maxcess Offers:

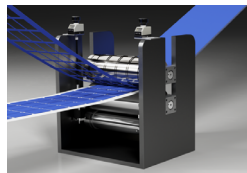

- American-Based Factories
- Spare Parts Shipped Within Hours
- On-Site Service Technicians Ready When You Need Them

## Learn More About RotoMetrics' Tag and Label Solutions

### Flexible and Solid Dies

- Same day shipping available.
- Featuring proprietary manufacturing processes that allow extremely small blade spacing for intricate patterns.
- Enhance die performance with RotoRepel™ adhesive control treatment.

### AccuAdjust

- Pressure monitoring.
- Cut depth safety measure.
- Data can be used to address quality complaints.
- Requires less onboarding for die-cut parameter setup.

# End-to-End Solutions

Maxcess understands how each stage of web processing impacts the next, underlining the importance of high quality equipment that you can rely on. Maxcess provides complementing products that work better together to increase productivity and eliminate errors in the tag and label industry.

## Componex & WEBEX Plasma Spray Coatings

Componex and WEBEX plasma spray coatings provide exceptional wear resistance and a consistent coefficient of friction, preventing material damage, slippage, adhesive buildup or static issues during high-speed web transport.

## Fife-500 Max

The Fife-500 MAX is an advanced web guiding system designed to enhance precision and efficiency in web handling processes, making it particularly suitable for the delicate materials in the nonwoven industry.

## MAGPOWR Cygnus Controller

The Cygnus offers weightless load cell calibration for quick setups. Maintain web tension or adjust it using multifunction "smart keys" and a large backlit display for easy viewing. Improve consistency with powerful features like automatic tuning and out-of-round roll compensation.

## Tidland RD AutoScore

The Tidland RD Scorer is engineered for accurate and repeatable score cuts, even on paper, film, and other challenging materials. Its durable design and quick-change blade holder make it ideal for high-efficiency slitting operations.

## Extend Tool Life with Expert Cylinder Support

Maxcess offers on-site audits and training for your tooling solutions. Our experts inspect for wear, damage, and provide hands-on training to help your team properly maintain all tooling solutions. Extend your tool life, improve cut quality, and avoid costly downtime.
