

# Strip Guiding Specialist

Off-tracking problems can force slower line speeds and cause damage to your equipment, and even the strip itself. Fife, a Maxcess legacy brand, has over 80 years of hands-on experience, our knowledge is unmatched in strip handling products, applications, installation, and customization.

## 24/7 Service and Support for the Metals Industry

Uptime is everything—you need equipment that lasts. Maxcess delivers reliable solutions, ready to ship parts, with expert support just a call away. Do business with people you can trust to be there for you during thick and thin.

### Maxcess Offers:

- American-Based Factories
- Spare Parts Shipped Within Hours
- On-Site Service Technicians Ready When You Need Them

## Learn More About Fife's Top Strip Guiding Solutions

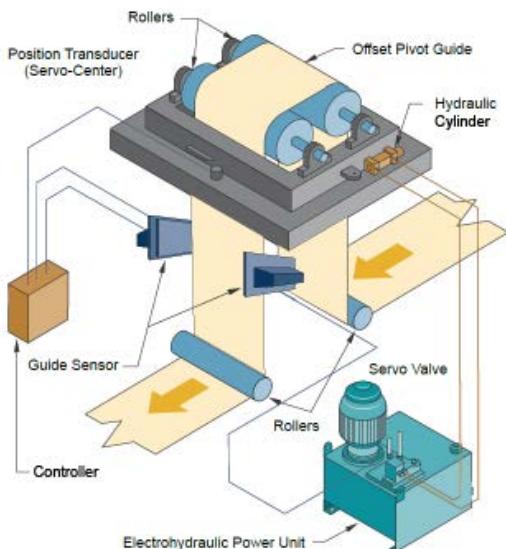

### D-MAX E Digital Guiding Controller

- Industry leading controller precision in any strip guiding application
- Compatible with all Fife sensors: Radar, Capacitive, Inductive, IR and Cameras
- Custom software available

### ExactTrak Radar Sensor

- Proven best practice furnace guiding applications
- Precisely monitors strip position from outside hot harsh furnace environment
- Capable of self-monitoring

# Supporting Products

Maxcess understands how each stage of strip processing impacts the next, underlining the importance of high quality equipment that you can rely on. Maxcess provides complimenting products that work better together to increase productivity and help eliminate errors in the metals industry.

## MAGPOWR

### MAGPOWR MTS / GTS Load Cells

- Precisely measures strip tension and shear
- Designed to survive harsh environments
- Built in overload-stops

## MAGPOWR

### MAGPOWR DLCA-Net Load Cell Amplifier

- Compatible with all MAGPOWR load cells
- Used to interface/condition load cell signal to output for drives and PLC's.
- The Industries only integrated "Weightless Load Cell Calibration"

## TIDLAND

### Tidland 500 Series Air-Expanding Lug Shafts

- Ideal for film and paper liners used with recoiler controls for coated/painted coils.
- Convenient air inflation and deflation allows for torque transfer and quick roll changes.
- Diverse range of styles available to address any application

### From Fives to Fife: Strengthening Our Legacy

In 2015, the Fives North American guiding business and all intellectual property was purchased by Maxcess and put under the Fife product line. This acquisition added decades of expertise to Maxcess' already deep bench of strip handling knowledge.
