# Supporting Products

Each stage of web processing impacts the next, underlining the importance of quality equipment that you can rely on. Maxcess provides complementing products that work better together to increase productivity and help eliminate errors in the tire and rubber industry.

**MAGPOWR**

## MAGPOWR TS Load Cells

Built for both live and dead shafts, these rugged load cells offer exceptional accuracy and versatile mounting options, all in a compact design that fits easily within machine frames.

**TIDLAND**

## Tidland D6X Differential Air Shaft

Engineered for safety and efficiency, our lightweight, ergonomic air shafts make handling larger rolls at higher speeds effortless. For precise tension control, the innovative GX Differential Air Shaft equalizes tension across multiple rolls, perfect for duplex center or surface winding applications.

**MAGPOWR**

## MAGPOWR Magnetic Particle Brakes

MAGPOWR Magnetic Particle Brakes and Clutches deliver accurate torque with smooth, dust-free, and silent operation. Built for durability, they offer years of maintenance-free performance.

**TIDLAND**

## Tidland Boschert Safety Chucks

Tidland's Boschert Chucks securely center rolls during winding and unwinding, with automatic closing for a reliable grip. Designed for fast roll changes and precise web handling, they deliver safe, efficient performance in demanding production environments.

## 24/7 Service and Support for the Tire and Rubber Industry

Uptime is everything- you need equipment that lasts. Maxcess delivers reliable solutions, ready-to-ship parts, remote troubleshooting, or boots on the ground. With Maxcess, expert support just a call away. Work with people you can trust to be there for you through thick and thin.
