

RotoGuard™ XT

Choose RotoMetrics® for all your print technology needs

- NEW exclusive coating from RotoMetrics® provides an enhanced formation on surface to protect from scratches and corrosion
- Provides extended life on your print tooling investment
- Most durable anodized coating in the flexographic market
- Vibrant Black Color
- Manufactured in-house to ensure accuracy and consistency

Advanced Scratch Protection

- Advanced ceramic formulation provides extreme wear, chemical and corrosion resistance
- Will not chip, crack, peel, or rust
- Up to 15x more durable than standard Hard Anodized print cylinders
- Surface Breakthrough Testing
Hard Anodized = 90 cycles
RotoGuard™ = 130 cycles
RotoGuard™ XT = 1700 cycles
RotoGuard™ XT outlasts competition in independent abrasion testing
