# FIFE SE-37 ULTRASONIC SENSOR

With a control range of 25.4 mm (1 inch) and a sensing gap of 76.2 mm (3 inches), the SE-37 is our largest ultrasonic sensor. Temperature stabilized, this sensor is ideal for guiding both clear films and most opaque webs.

Because the SE-37 is unaffected by optical variation or ambient light, it eliminates the need for multiple sensors, resulting in decreased downtime and increased productivity. Improved circuitry reduces the effect of standing waves and temperature variations, which improves the overall operational performance.

# **GENERAL SPECIFICATIONS**

## Product Name SE-37 Ultrasonic Sensor

**Linearity** 5% nominal maximum error

**Plane Change** 5% nominal maximum error

Power Required 10 to 15 VDC at <27 mA **Output Signal** 0 to 10 mA

Update Rate 6 ms

Weight 566 grams (20 ounces)

**Temperature Range** 0° to 60° C (32° to 140° F)

## **KEY FEATURES**

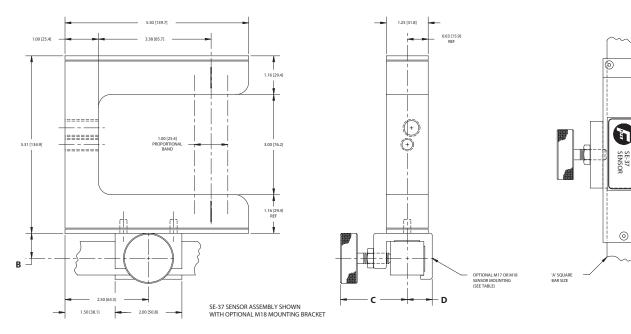

- The largest of the ultrasonic family, ideal for guiding the thinnest and clearest of films, as well as most opaque webs
- Immune to web plane changes and unaffected by optical variations or ambient light, including sunlight
- Will not affect photosensitive paper or film
- Compatible with all Fife controllers
- Flexible mounting and positioning assemblies ensure quick and easy installation
- Electrostatic discharge protected
