

The CDP-01 has been a trusted controller for more than 40,000 process lines throughout its 20+ years in the global market. Unfortunately, it is now obsolete and we can no longer source parts for it.

To support your needs and to provide the best technology for your guiding system requirements, we've designed a replacement bundle that offers an easier path to upgrade your CDP-01 controller to our premier D-MAXE controller with the latest technology to enhance your process line, allowing you to run **faster** than before, with **less downtime**.

- **Drop in replacement** - Quick and easy upgrade on your line in as easy as four steps!
- **Safe Dual Rail Power** - Supports CE safety recommendations to separate controller power from power to the guide structure.
- **Reverse Polarity Protection** - Eliminates the chance of damaging the controller board if wired incorrectly, keeping downtime to a minimum.

FIFE CONTROLLERS	CDP-01	GOOD DP-20	BETTER DP-30	BEST D-MAX
Drives	1, 2 or 3	1	1	1, 2 or 3
System Gain	48	55	55	57
Motor	2.6 Amp	1.3 Amp	2.6 Amp	2.6 Amp
Process size	16 Bit	16 Bit	16 Bit	32 Bit
Processor speed	3 MIPS	16 MIPS	16 MIPS	400 MIPS
Voltage	110/ 230 V Switch	90-264 V	90-264 V	90- 350 V
IP rating	IP40	IP54	IP54	IP54
Ethernet	NO	NO	NO	YES
Programmable	YES	NO	NO	YES
PTP1 and PTP2	NO	NO	NO	YES
Dual Rail of Power	NO	NO	NO	YES
RoHS Compliant	NO	NO	NO	YES
Localization	NO	5	5	16+
Drop in replacement	N/A	NO	YES	YES
