

VALLEY ROLLER

Premium Rock™ & Premium T Rock™ Series Roll Coverings

Bone-Hard Rubber Roll Coverings for Pulp & Paper

Performance that goes beyond simple hardness ratings. The PREMIUM ROCK™ Series was developed by Valley Roller Company specifically to meet the demands of paper industry rolls requiring 0-1 P& J hardness. Based on innovative formulas, these roll coverings achieve more than just the required hardness. They provide superior performance in chemical resistance, hardness stability, hysteresis, heat stability, abrasion resistance, thermal expansion and friction requirements. The stability of the Premium Rock™ Series roll coverings make them ideal for nip applications under a broad spectrum of operating conditions. Exposure to paper mill chemicals, nip loads, and high speeds are no threat to the high-performance characteristics of these advanced, bone-hard coverings.

Fight the "stickies" with T and TT Rock. If your rolls have the case of the "stickies," try our Premium T and TT Rock grades. Formulated with release agents, these grades will greatly reduce pulp from adhering to the roll. Premium TT Rock offers twice the release agents as T Rock.

Run better, faster and smarter with Valley Roller coverings from Maxcess.

Key Features & General Specifications

- Resistance to pulp and paper chemistry increases life of rolls
- Optimum coefficient of friction helps you run faster
- Outstanding abrasion resistance to minimize downtime and maintenance
- Hardness remains stable as temperature rises
- Premium T Rock contains release agents to reduce pulp from adhering to rolls
- Premium TT Rock contains double the release agents for the toughest applications

Properties for Pulp & Paper:

- Chemical resistance*
- Hardness stability*
- Dynamic properties*
- Coefficient of friction*
- Abrasion resistance*
- 3 premium options to fit your application needs*

Premium Rock™

COVERING OPTIONS TO FIT YOUR PAPER MILL APPLICATION			
Roll	Premium Rock	Premium Press Rock	Premium T / TT Rock
