

BEST QUALITY WITH NARROW SLITS

The Tidland W19 knifeholder combines all the advantages of the Tidland swing cartridge with a rigid and robust design, achieving a minimum slit width of only 19mm, while delivering best slit quality and extended blade life.

The Tidland W19 knifeholder also features a reference finger for quick and precise adjustment of the knifeholder position relative to the anvil blade.

No tools are required to remove the quick release blade cartridge from the knifeholder body. When performing this operation, the blade is easily removed from the front of the knifeholder without the need for any space at the sides. This allows the knifeholder to remain in its slitting position on the guide bar when replacing the blade.

This unique feature of the Tidland W19 significantly reduces the system downtime, since the knifeholder is immediately ready to work as no repositioning is required after the blade change.

GENERAL SPECIFICATIONS

Blade Diameter	Down stroke (Cartridge)
105 mm	18 mm
Minimum Slit Width	Maximum Slitting Speed
19 mm	1600 m / min
Side shift (Blade)	Recommended Air Pressure
1,8 mm	3 – 6 bar

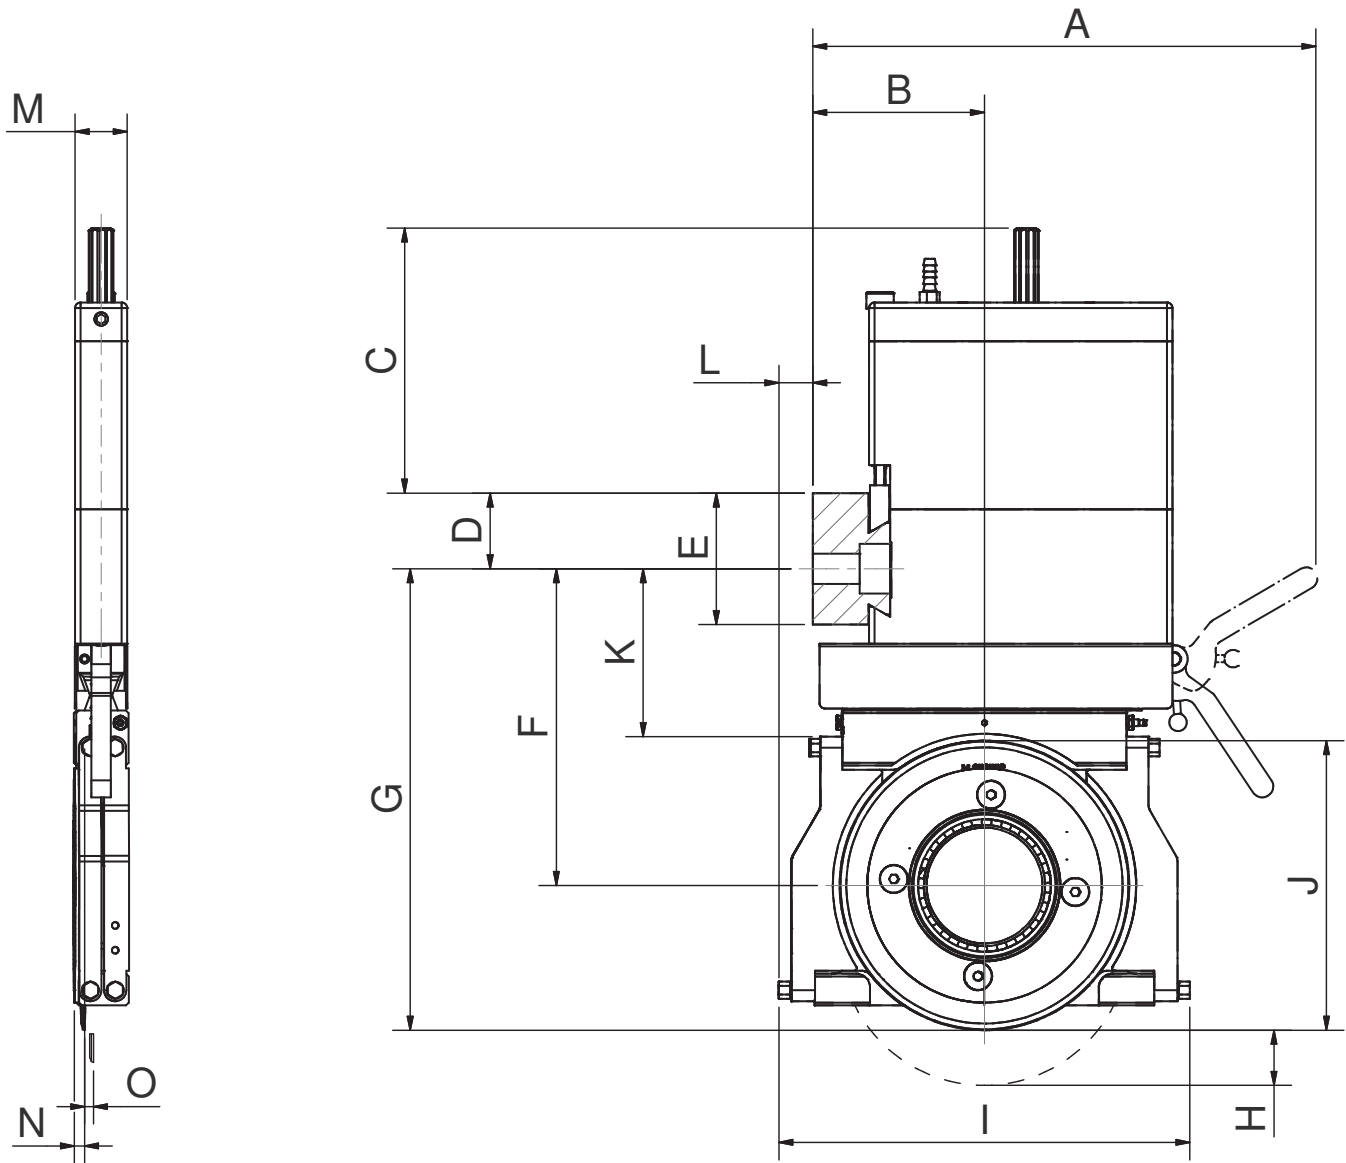

KEY FEATURES

- Robust double-rod construction to withstand harsh industrial environments
- Integrated Reference finger for precise blade position setting
- Uses 180° reversible blade cartridge, allowing use of both sides of the anvil ring, extending blade life
- No tools required for blade cartridge removal
- Fully compatible with Tidland C1 knifeholders and dovetail guide bar
- 360° mechanical blade guard available as option
