

RD Scorer and RD Razor Slitter

RD Scorer

RD Razor Slitter

RotoMetrics RD Scorer and RD Razor Slitter are self-contained units that bolt onto your press in any location you feel is most advantageous.

And because they're not gear driven and require no power from the press, our RD Scorers and Slitters can replace adjustable scoring/slitting tools that already exist in one of your die cutting stations. That frees your stations for other die cutting or laminating jobs, giving your press added versatility and profitability.

RD Scorer:

- Consists of an anvil roll, cutting blades, blade holders, mounting shaft for blades and mounting brackets for the unit
- Includes three blade holders with fully hardened tool steel blades; more may be added as an option
- Blades can be refinished; replacements are a stock item and are available for immediate delivery
- A variety of perf blades is also available
- Cutting blades are fully adjustable across the web (center-to-center across minimum spacing is .750" - 19 mm)
- Depth of cut can be easily adjusted by turning an adjustment screw on each blade holder

RD Razor Slitter:

- Specifically designed to slit films, but can also be used to slit paper and other substrates
- Standard unit is equipped with four blade holders with blades, plus unique control features that allow for lateral adjustment of individual blades, or all blades at once
- Rotating blade holder fine-tunes the position of the cutting blades
- Cutting blades can be rotated and flipped, providing four cutting edges per blade

For more information about the RotoMetrics RD Scorer, RD Razor Slitter and our complete line of rotary tooling — or for answers to your technical questions — contact your RotoMetrics sales representative.
